

Put your transactions
in safe hands

REAL TIME GROSS SETTLEMENT WITH LOGICA

THE CHALLENGE

Key benefits

- One of the most popular RTGS systems on the market
- One of the first RTGS systems in the world
- More than 100 million high value payments each year
- \$20 trillion processed each year
- 250,000 payments processed by one client on peak days

Today's fast-paced business world couldn't exist without real time gross settlement (RTGS). Trade is global. More businesses in more countries are working together, more of the time. As a result, it's more important than ever for payment systems to be secure.

You need an RTGS system that's reliable, inexpensive to maintain and easy to update. It needs to be able to keep your money safe during financial disasters such as the recent recession. And it needs to be relevant to the world today.

OUR ANSWER

Logica's Central Accounting System (CAS) – an industry standard

A long time ago we noticed that almost all RTGS systems were outdated and expensive. More and more countries wanted to replace old systems with newer ones. So we created an all-new product: CAS.

Today, it's the product of choice for 18 banks and financial institutions in 14 countries. This makes it one of the most popular RTGS systems in the world.

Software you can trust

Many RTGS systems are tied into old, expensive infrastructures that can't be updated. Ours isn't. With CAS, you get great software from a partner with a history of building national payment systems. Here's the lowdown:

Tailored to you

As well as the base system, we offer a variety of add-ons to help you personalise your service.

Reliable

It's a tried and tested system. Banks have been using CAS for years.

Easy to install

We built CAS in line with global standards for security and messaging. So it fits with the technology you already have in place.

Low cost

There's no need for a big support team.

Support from Logica

We won't just set you up and disappear. Our experts are there to make sure you're happy.

Always improving

RTGS systems should adapt to a country's needs. CAS is an ideal choice for developing countries looking for a more modern payment structure. And also for developed countries that need to replace old, outmoded infrastructures.

That's largely thanks to feedback from our CAS user group. With their suggestions, we've added features like:

- Funds reservation
- Bilateral limits
- Interest calculations day and night
- Settlement in a wide variety of currencies
- A collateral management module

Logica's Central Market Infrastructure Suite

CAS is part of a set of products. The suite also includes our Central Securities Settlement (CSS) for managing government debt, and Automated Clearing House (ACH) for processing large numbers of debit and credit transactions.

CSS

- An award-winning system
- Manage online auctions, with successful bids automatically settled
- Instantly check transactions online
- Check your income entitlement for interest and redemption

ACH

- We support all payments
- That includes automated teller machine and point of sale transactions, cheque truncation and imaging, electronic credits and direct debits

WHY WORK WITH LOGICA?

Nobody knows the market better. We've been building national payment systems for over 30 years. We help businesses and governments stay current, offer better products and save money. And we do it with a mixture of consultancy, specialist outsourcing and cutting edge technology.

Logica is a business and technology service company, employing 39,000 people. It provides business consulting, systems integration and outsourcing to clients around the world, including many of Europe's largest businesses.

Logica creates value for clients by successfully integrating people, business and technology. It is committed to long term collaboration, applying insight to create innovative answers to clients' business needs. Logica is listed on both the London Stock Exchange and Euronext (Amsterdam) (LSE: LOG; Euronext: LOG). More information is available at www.logica.com
